as and the forts continued.

The most spectacular event so far in the war it was. The marksmanship of the Texas was marvelous. Though over two miles away ann in an awk-ward position, she dropped shell after-shell right on the ridge of the hill where the enemy's guns lay. Clouds of yellow earth rose high in the air.

The crew of the flagship greeted each of these with loud cheers. Puffs of white smoke shot through the yellow canyon. These were shots from the sammy. They stuck to their guns well, but their aim was wild, the shots failing some a mile abead and some a mile astern of the Texas. Finally the enemy's shots became few and far between.

spimself against Dr. Warfield for the
boss of his position. The professor declares that he brooded so much over the
boss of his position that his mind beeame urbaianced and little by little he
sielded to the awful desire to destroy
in order to gain revenge.

He carefully concocted plans to destroy Pardee Hall, the pride of Larayeitle Accordingly on the night of December 17 he entered the hall with a
key he had not turned over to the factly when he left the college. He went
to the department of biology, over
shich Professor Davidson presides,
and against whom he had an imaginary
frievance, and pilled rugs, mats, carbets and every portable and inflammable article he could lay his hands on in
a heap. Then he ran a gas burner under the inflammable collection, turned
on the gas and applied the match.

Stevens stood at the railroad station
and calmly watched the work of destruction. At various other times lateon he returned to Easton and on each
occasion committed acts of vandalism.
Seevens was taken to juil this evening.
Tomorrow District Attorney Fox will
sevear out another complaint charging
film for arson. Stevens' relatives are

KINGSTON. JAMAL(A. Thursday,
June 23.—7.20 A. M.—With the complete investment of Santiago de Cuba
by land and by sea but a few days off,
the admiral has decided to strengthen
the blockade and the large ports on the
southern coast westward of Santiago.
For three weeks the south coast,
west of Santiago to Cape San Antonio,
has been practically unprotected. The
blockade has been simply on paper, in
name only, with the result that it is
known quite a number of shios have
trun the blockade and that an immense
quantity of previsions have been
smuggled into Havana. Mest of the

OFF FOR MANILA.

noon. The collier Nora, which will accompany the Monadnock, went our first. The warship followed in a few minutes. Men on the Monadnock think that the ship will make the trip to Manilla in about twenty-three days.

The Monadnock has sufficient coal to carry her to Honolulu and will make that provide the coal to carry her to Honolulu and will make that port under her own steam. She has 350 tons in her bunkers and over 100 tons upon her decks. From Honolulu the Nero will tow her to Manilla and the best appliances for that purpose have been put on both vessels. The Nero has at least 5,000 tons of coal.

Of the spectators much or little may be said. The disagreeable weather, which ruined the pleasure of the thousands who came to witness the 'Varsity race yesterday, so dampened their enthusiasm that the 'Varsity race today was viewed by hundreds less than were present yesterday. A conservative estimate of the number of race-goers places it at 6,000.

Representative Pearson, uncle of American interests.

Representative Pearson, uncle of Naval Constructor Hobson, had abother interview today with Secretary Long respecting the reward of that nero. The secretary is puzzled by the conflicting interests in this case. He interests to reward Hobson in accordance with the merits of his feat, but would like to do this without injustice to other meritorious officers, A study of the naval register shows that if Hobson is advanced to the grade of lieutenant commander he will have been given greater reward than was ever known in our naval history. Cushing got fifty-six-numbers and gained one year and nine months' time in his record, yet Hobson, it is calculated, will be given, if made a naval commander, if numbers, and will gain twenty years in time. He will become senior officer of the navy in about fifteen years and owing to his youth will retain this place no less than twenty years on the height gain and the present of the mans of rewarding our naval officers who are desirous of finding some other means of rewarding our naval heroes which, while thoroughly satisfactory to them, and their friends, will not work injustice to others.
